

PRAYAS JAIN

AI Engineer · LLM Systems · Full-Stack Development

prayas1711@gmail.com | +91-7970033564 | India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience building and deploying production-grade intelligent systems, alongside ongoing freelance work for global clients. Specializes in LLM applications, RAG architectures, and multi-agent systems, delivering scalable AI and end-to-end SaaS solutions.

TECHNICAL SKILLS

Languages:	Python, JavaScript, Java, C++, SQL
AI & LLM:	LLM Fine-Tuning, RAG Pipelines, Multi-Agent Orchestration, Prompt Engineering, OpenAI API, Anthropic API, LangChain, LangGraph, Hugging Face Transformers, RLHF, Embeddings, Semantic Search
NLP & CV:	Named Entity Recognition (NER), Sentiment Analysis, Intent Detection, Text Classification, OpenCV, YOLO, Object Detection
Backend:	FastAPI, Django, REST API Design, GraphQL, Microservices, Event-Driven Architecture, WebSockets, JWT, OAuth 2.0, Apache Kafka, Celery
Frontend:	React.js, Next.js, TypeScript, Tailwind CSS, Responsive UI Design
Databases:	PostgreSQL, MongoDB, Redis, FAISS, Pinecone, ChromaDB, Weaviate (Vector Databases)
Cloud & DevOps:	Microsoft Azure, Docker, Kubernetes (basic), CI/CD (GitHub Actions), Linux, Nginx, Cloud Deployment, Infrastructure as Code
Practices:	System Design, Agile/Scrum, API-First Development, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

AI Engineer

Apr 2026 – Present

AiTrillion | eCommerce Marketing Automation

Indore, India · Full-Time

- Serve as lead AI developer, owning the end-to-end design and delivery of AI capabilities integrated into a large-scale eCommerce marketing automation platform.
- Architected production-ready Retrieval-Augmented Generation (RAG) pipelines enabling intelligent, context-aware query handling across platform data — improving response relevance and reducing hallucination risk.
- Designed and implemented a multi-agent orchestration system using LangGraph to automate complex, multi-step marketing workflows, reducing manual intervention and improving campaign execution speed.
- Built AI features from scratch in close collaboration with product and engineering teams, driving 0-to-1 delivery of intelligent platform capabilities aligned with business objectives.
- Established best practices for LLM integration, prompt engineering, and AI safety within the engineering org.

Associate Data Science Engineer

Jul 2024 – Mar 2026

Techdome Solutions

Indore, India · Full-Time

- Led end-to-end development of an AI interview platform powered by LLM APIs and FastAPI, processing 50+ automated interview sessions per day with structured candidate evaluation report generation — reducing recruiter workload by 40%.
- Engineered modular Python/FastAPI microservices following RESTful API design principles; optimized async processing and database query patterns, achieving a 35% reduction in response latency across services.
- Designed and deployed an event-driven WhatsApp automation backend for a real estate lending platform using Apache Kafka and webhook integrations, reducing manual follow-up operations by 50%.

- Built a real-time LLM-powered developer assistant for an API testing platform, integrating context-aware debugging suggestions that cut average developer debugging time by 30%.
- Collaborated across product, QA, and DevOps teams to deliver containerized (Docker) solutions with CI/CD pipelines on Microsoft Azure; maintained 99%+ uptime SLAs in production.

Freelance AI & Full-Stack Engineer

Independent Contractor

Jan 2024 – Present

Remote

- AI-Powered Trade Analysis & Journal Platform — Subscription SaaS with real-time analytics dashboards, performance tracking, portfolio insights, and Stripe billing integration; built on a React + FastAPI + PostgreSQL stack.
- Intelligent Workflow Automation Platform — Designed and shipped an AI automation engine using OpenAI Assistants API and function calling to orchestrate long-running, multi-step business processes for operational teams.
- Custom SaaS Platforms — Architected microservices-based backends with domain-driven design, JWT/OAuth 2.0 authentication, role-based access control (RBAC), and horizontally scalable cloud deployment.
- E-Commerce Platform — Built a fully-featured, production-grade marketplace with separate Admin and User portals, product catalog management, order lifecycle, inventory tracking, and PCI-compliant payment integration.

AI Engineer Intern

Techdome Solutions

Apr 2024 – Jul 2024

Indore, India · Internship

- Designed an AI-powered mortgage automation platform using FastAPI and NLP-based intent classification to intelligently route user queries — reducing query resolution time by 25%.
- Trained, evaluated, and iterated on sentiment analysis models on large-scale financial datasets using Hugging Face Transformers, achieving 75% accuracy for automated market trend monitoring.
- Collaborated with senior engineers on system design reviews and participated in Agile sprint cycles, delivering features on time within a production engineering environment.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

Indore Institute of Science and Technology ·

Aug 2021 – Aug 2025

Indore, India

CERTIFICATIONS & AWARDS

Awards

- Applause Award — Acknowledged for outstanding cross-team collaboration and measurable impact across engineering, product, and operations functions.
- Spot Award — Recognized for exceptional delivery under pressure, shipping critical features on tight timelines without compromising quality.

Certifications

- Data Science Job Simulation — BCG (via Forage)
- Breaking into Project Management — GeeksforGeeks
